TITLE The Annual Report on the Economic Status of the Profession, 1989-90.

INSTITUTION American Association of Univ. Professors, Washington, D.C.

PUB DATE 90

NOTE 97p.

AVAILABLE FROM American Association of University Professors, Suite 500, 1012 14th St., NW, Washington, DC 20005 (\$30.00).

PUB TYPE Collected Works - Serials (022) -- Statistical Data (110)

JOURNAL CIT Academe: Bulletin of the American Association of University Professors; v76 n2 Mar-Apr 1990

EDRS PRICE MF01/PC04 Plus Postage.

DESCRIPTORS *Academic Rank (Professional); Age; *College Faculty; *Economic Status; Educational Economics; *Fringe Benefits; Higher Education; Medical Education; Nursing Education; Professors; *Salaries; Sex Differences; Tenured Faculty

ABSTRACT

This report presents data on the economic status of university professors, including, among other statistics: weighted average salary, average compensations, and percentage increases in salary for continuing faculty, by category, affiliation, and academic rank; average fringe benefits in dollars and as a percentage of average salary; percentage of faculty members with tenure status; percentage increases in average salaries (monetary and real); salary levels of continuing faculty, full professors, and new assistant professors, by discipline; average age, average salary, and percentage of faculty by category, academic rank, and gender; percentage distribution of faculty members by age, academic rank, and gender; and number of full-time faculty and average salaries in preclinical departments of medical schools and in nursing. Highlights of the report are discussed in an article by Hirschel Kasper titled "Some Dynamic Aspects of Academic Careers: The Urgent Need to Match Aspirations with Compensation." These highlights note that real salary levels increased 1.1% from 1988-89 to 1989-90; only 4.6% of all full-time faculty are women and in the rank of full professor; and average salary levels for faculty at four-year colleges averaged \$42,200 and \$34,230 for those at two-year colleges. MEMBERSHIP INFORMATION

1990 ANNUAL NATIONAL DUES

Dates effective through December 31, 1990. Dues are tax-deductible except for \$7.00 attributable to *Academe*.

Active/Full-time: \$81

Eligibility—Individuals at approved institutions¹ who: (a) have faculty status as teachers or researchers; (b) are professional librarians; (c) are counselors with faculty status; or (d) are professional appointees who are included in a faculty collective bargaining unit.

(Active members who retire for age may retain their active status and thus the ability to vote and hold office or they may transfer to *emeritus* membership. Administrators whose teaching or research duties are less than half a normal load are not eligible for *active* membership. They are invited to transfer to *associate* membership or to join as *public* members.)

Active/Entrant: \$41/\$61

Eligibility—Nontenured faculty for up to seven years for new members: first four years of membership at one-half dues and up to three years at three-fourth dues.

Active Part-time: \$20

Eligibility—Faculty who receive from an institution of higher education no more than 50 percent of the salary of an equivalent full-time faculty member in a given year, or faculty who are termed part-time under a collective bargaining agreement.

(*Active/full-time* members who become unemployed are eligible for this category for a maximum of two years at which time they may resume *active/full-time* membership or become a *public* member.)

Graduate Student: \$20

Eligibility—Individuals who are, or have been, doing graduate work in an approved institution.¹ Eligibility for this category for up to five years.

(One may not hold *graduate student* membership if eligible for *active* membership.)

Public: \$61

Eligibility—Individuals not eligible for *active*, *graduate student*, *associate* or *emeritus* memberships.

¹"Approved institution" means one on the accredited or candidate for accreditation lists of the established regional or professional accrediting agencies, subject to modification by action of the Association. A member may change occupation or transfer to an institution not on the Association's approved list without affecting eligibility for continuance of membership.

Joint (Second) Membership: \$41

Eligibility—A husband and wife who are both *active* members may request *joint* membership. They will receive one subscription to *Academe* and the dues of one will be reduced.

MEMBERSHIP BY TRANSFER

Associate: \$61

Eligibility—An *active* or *graduate student* member who becomes an administrator with less than half a normal teaching or research program.

Emeritus: \$20

Eligibility—An *active* or an *associate* member retiring for age may request transfer to *emeritus* membership. *Emeritus* members may not vote in elections or at meetings.

After eligibility has been determined and membership recorded, new members will receive acknowledgement individually.

1990 MANDATORY STATE DUES²

Full-time members in the following states should pay:

Illinois:	\$14	Texas:	\$11
North Carolina:	\$ 6	Virginia:	\$ 5
Pennsylvania:	\$ 7	Washington:	\$12.50

All categories of members in the following states should pay:

Indiana:	\$ 5	Nebraska:	\$ 5
Massachusetts:	\$ 5	South Carolina:	\$ 7

Members in the following states should pay:

Georgia/West Virginia/New York/Tennessee	Ohio
Full-time	\$10
Entrant	\$ 5/8
Part-time	\$ 3
Graduate/Emeritus	\$ 3
Public/Associate	\$ 8
Joint	\$ 5

1990 MANDATORY CHAPTER DUES²

Fairleigh Dickinson University: senior-\$50; junior-\$30

Georgetown University: \$3

Middle Tennessee State University: \$5

Oregon State University: \$8

University of Tennessee-Martin: \$5

University of Tennessee-Knoxville: \$5

²Most conference and/or chapter dues are not tax-deductible as charitable contributions. For further information contact your conference or chapter.

Some Dynamic Aspects of Academic Careers: The Urgent Need to Match Aspirations with Compensation

- Real salary levels increased 1.1 percent—equal to the increase from 1987-88 to 1988-89.
- Increases in salary for continuing faculty averaged 7.3 percent, or 2.3 percent in real terms.
- The average rate of increase of real salaries during the decade of the 1980s was 1.9 percent per year; however, the average annual rate of losses in real dollars during the academic years 1972-73 to 1980-81 was 2.7 percent.
- It will take until 1995-96 to fully restore the purchasing power which faculty enjoyed in 1970-71.
- Only 4.6 percent of all full-time faculty are women and in the rank of full professor.
- Average salary levels for faculty at four-year colleges averaged \$42,200 and only \$34,230 for those at two-year colleges.

These highlights and others are discussed in the report by Professor Hirschel Kasper, chair of AAUP's Committee Z on the Economic Status of the Profession.

The faculty data used to prepare this report were provided by institutions responding to the AAUP Annual Survey conducted by Maryse Eymonerie Associates, also responsible for editing, processing, and preparing the statistical materials that appear in this report. Any questions concerning these data should be directed to Maryse Eymonerie Associates, P.O. Box 7893, Hilton Head, SC 29938. For additional copies of the report, send a check for \$30 to AAUP, 1012 14th Street, N.W., Suite 500, Washington, D.C. 20005. Prepaid orders only.

Some Dynamic Aspects of Academic Careers: The Urgent Need to Match Aspirations with Compensation

The Annual Report on the Economic Status of the Profession, 1989-90¹

In 1989-90, the average salary level of college and university faculty was 6.1 percent above the level for 1988-89, slightly higher than the 5.8 percent increase of the previous year. The average salary increase for 1989-90 of continuing faculty was 7.3 percent, up from 6.8 percent in 1988-89. The apparent improvement fades because the rate of inflation, as measured by increases in the "cost-of-living" Consumer Price Index (CPI), rose faster during academic year 1989-90, i.e., 4.9 percent, compared to the 4.7 percent rate from 1987-88 to 1988-89. As a result, in real dollars, adjusted for inflation, average salaries for all faculty ranks (combined) increased by 1.1 percent from 1988-89 to 1989-90, just as that from 1987-88 to 1988-89. For continuing faculty, the increase in real average salaries from 1988-89 to 1989-90 was 2.3 percent, a gain over the 2.0 percent increase of the previous year.

THE ACADEMIC PROFESSION AS A LIFETIME CAREER

This year's report provides a longer-term perspective on the economic aspects of academic careers than is customary. A fuller consideration of the dynamic issues involving the attraction, retention, and enhancement of faculty should provide not only greater understanding of the financial situations faced by current faculty but should also help provide background information for those concerned with making academic policies during the coming decade. Data are provided which describe the relation between the average salaries of faculty and their ages, by gender, for selected representative institutions.

The average level of salaries in real dollars increased every year throughout the decade of the 1980s, reversing the situation which occurred during the eight-year period from 1972-73 to 1980-81, when the increases in average salary levels were never as high as the inflation rate. The average rate of increase of real salaries during the decade of the 1980s was 1.9 percent per year; however, the average annual rate of losses in real dollars during the academic years from 1972-73 to 1980-81 was 2.7 percent.

Thus, while relatively young faculty have observed a pattern of improvements in real average salary levels, their colleagues who have been teaching for twenty years recognize that the current average salary levels, adjusted for inflation, are still below the levels of 1970-71. This difference in experience may partially explain the often-reported concern about compression of faculty salary structures and its consequent strains on collegiality and campus budgets.

¹The data for this report were collected, processed, and tabulated for the American Association of University Professors by Maryse Eymonerie Associates, Hilton Head, South Carolina.

Although average real salary levels of many professions fell during the 1970s, the real salaries of most professions regained their former levels by 1985. Faculty have not done as well. It will take until 1995-96 to fully restore the purchasing power which faculty enjoyed in 1970-71, assuming that faculty salary levels continue to increase at the same real rate for the next six years as they have during the last six. To put the matter in an historical perspective, it may take nearly a generation for some faculty, who began their careers in 1970, to obtain rewards in real dollars for their long service in academe.

There are at least two dimensions to what are sometimes termed "catch-up" salary increases. First, there is the understandable and human desire to serve in a career in which intellectual progress is matched with financial progress. Second, there is the broader, if elementary, need for the community at large to try to assure continued intellectual progress by attracting new persons with new ideas into the academic profession. The two dimensions are tied together for the academically strongest students who have to base their career choices on the current alternative salaries of different professions. In that sense, to underpay faculty today is to discourage a student from becoming a faculty member tomorrow. If the country is going to respond to the projected shortage of faculty in the next five years, one pivotal place to begin is with the compensation of today's faculty.

The shortfall in faculty salaries has had adverse consequences for the number of people undertaking study for doctorate degrees, and the number of persons with doctorate degrees who embark on academic careers. National Research Council data show that the annual number of doctorates awarded in the United States peaked in the early 1970s, when the number of doctorates awarded to U.S. citizens also peaked. Since then, the decline in the number of doctorates awarded to U.S. citizens has been so severe that, even though the number of doctorates awarded to persons studying in the United States on temporary visas increased by 50 percent from 1976 to 1986, the total number of doctorates awarded in 1986 was below that of 1970.

When considering the relation between faculty compensation and the pursuit of an academic career, it is useful to distinguish between rates of increase in average salary levels of faculty and rates of increase in average salaries of continuing faculty. The two concepts address different issues. Because of the budgetary implications, the profession as a whole, together with legislators, university budget officers, and university trustees, may be initially interested in increases in average salary levels. On the other hand, the rates of increase of salaries for continuing faculty may be of special interest to that faculty and to others who have profes-

sional responsibilities for faculty development and institutional growth.

Increases in faculty compensation over the past twenty years have reflected forces such as the varied budgetary problems of the mid-1970s for both private and public institutions; changing institutional aspirations and missions; and the shifts to, and from, a more professional curriculum. Yet, while a recitation of those forces may help explain events on particular campuses, they mask the basic question of the appropriate rate of salary increase for a given faculty member. There is no single good answer to the question about the proper or fair rate of increase in salary for continuing faculty, independent of their discipline, background, and professional achievements. Different measures are reasonable and in place on different campuses, with differing results.

One measure worth considering would be based on a projection of real salary increases of 2.5 percent per year, a lower estimate of the average growth rate in the economy as a whole, over a person's career. At that rate a faculty member who began an academic career at age 30 would achieve a doubling in real income by age 58. If real salary increases averaged 2 percent per year over one's career, a person who began an academic career at age 30 would not reach a doubling in income before retirement at age 65.

Such modest measures will keep academic careers as relatively attractive as they have been in the past half-dozen years of "catch-up," when real increases for continuing faculty averaged nearly 2.6 percent, but will not necessarily make academic careers more attractive compared to other professional opportunities. For that goal, real increases would have to reach 3 percent per year.

It may be a useful exercise to examine the implications of a 3 percent rate of growth for real salaries for different cohorts of faculty members. Naturally, salary increases over a lifetime reflect both progress (and accomplishment) in real terms and inflation. A professor who was first appointed to the faculty in 1960 at a typical starting salary of \$6,000 would now be earning \$58,720 following average salary increases of 3 percent per year in real terms, above the average rate of inflation of 4.9 percent during those 30 years; someone else first appointed in 1970 at a typical salary of \$10,000 would now receive \$56,680 if salary increases averaged 3 percent in real terms, above the 6.1 percent annual rate of inflation since then. A new faculty member appointed in 1980 at a typical starting salary of \$20,000 would now receive \$40,850 if real salaries rose at a 3 percent annual rate above the 4.4 percent annual rate of inflation.

In the absence of extensive data on the length of faculty service and salaries of almost 300,000 full-time faculty members covered in this study, one can do little more than speculate about the proportion of faculty whose salaries have increased over their careers faster than the basic rate of 3 percent. However, representative data depicting the chronological ages and salaries of a large group of faculty are reported in the accompanying tables.

Interestingly, the hypothetical projections of salaries in the above exercise can add to our understanding of the problem of salary compression. Because compression is a sensitive matter, it is helpful to recognize that it may be caused by many factors, included unexpected swings in the rate of inflation.

For faculty first appointed during the 1970s, the average rate of nominal salary increases received over their academic careers is greater than that received by faculty appointed during the 1960s over their careers, thereby reducing the dollar distance between the salary levels of the members of the two groups. The salary levels of the two cohorts are being driven

closer together because nominal average salary increases during the 1970s, though often less than the rate of inflation, were relatively high compared to the pattern of the 1960s. Moreover, in contrast to the faculty appointed in the 1970s, who initially suffered losses in real salaries, faculty appointed in the 1980s have enjoyed real gains. Thus, fluctuations in the rates of inflation and the subsequent attempts to offset them have worked to compress salaries of relatively senior faculty compared to their relatively junior colleagues.

The data in Table I show that the increase in average salaries from 1988-89 to 1989-90 was 6.1 percent, larger than any during the past three years, yet no better than the median increase through the decade of the 1980s. After adjustment for an inflation rate of 4.9 percent for the 1989-90 academic year, the real increase in salary levels turns out to be 1.1 percent, no different from last year's increase. Of course, if the rate of inflation turns out to be higher than projected, as it did last year, the actual real gains will be even less than is reported.

CAREERS

An examination of the data in Table I demonstrates that there is no significant correlation between yearly changes in nominal and real salary levels since 1971-72. The unpredictability of real average salaries makes faculty members feel vulnerable and makes planning difficult for institutions. It would serve the interests of institutions if they were more successful in planning for inflation.

The average salary increases between 1988-89 and 1989-90 for continuing faculty, reported in Table II, reached 7.3 percent in nominal terms. There has been no increase larger than that since the increase received for the 1982-83 academic year. However, the real average salary increase from 1988-89 to 1989-90 for continuing faculty, adjusted for inflation, is only 2.3 percent, slightly higher than the average increase the previous year, but well below the average increases of the years from 1983-84 to 1986-87. The 2.3 percent increase was achieved in spite of the greater rate of inflation during 1989-90. So it is clear that, although the rate of inflation has risen each academic year since 1985-86, inflation is not an insurmountable barrier to raising the rate of growth of real salaries.

The data in Table II also show that the average percentage salary increases from 1988-89 to 1989-90 were, again, larger for continuing assistant professors than for associate professors, and smallest for continuing faculty at the full professor rank. The difference between the average increases for assistant and full professors was smaller this year, i.e., 7.8 percent versus 6.9 percent, compared to the uncommonly wide spread last year. The spread narrowed because the average increase for full professors rose by five-tenths of a percentage point, from the 6.4 percent from 1987-88 to 1988-89 to 6.9 percent from 1988-89 to 1989-90, while the average increase for assistant professors rose by only two-tenths of a percentage point to 7.8 percent during those years.

Table III, taken from a survey of institutions belonging to the National Association of State Universities and Land-Grant Colleges, presents salary information by discipline, albeit for only certain large institutions. Law, engineering, and computer information remain at the top of the salary lists for both full and new assistant professors. Fine arts and the humanities remain at the bottom, too, although the changes in salary levels for new assistant professors of fine arts and letters were, suggestively, larger than those for the (still higher paid) new assistant professors of law and computer information. In fact, there is little evidence in Table III of an increase in interdisciplinary dispersion of salaries.

¹Taken from the 1989-90 Faculty Salary Survey by Discipline of Institutions Belonging to the National Association of State Universities and Land-Grant Colleges, conducted by the Office of Institutional Research, Oklahoma State University.

This year's report examines the proportion of faculty who remained on the faculty from 1988-89 to 1989-90. Faculty leave institutions voluntarily and nonvoluntarily for many reasons, e.g., retirement, resignation in order to take up another career or another academic opportunity, nonrenewal of appointment, etc. Those factors operate differently at different times and at different institutions. A decade ago some institutions vigorously explored the advantages of early retirement for their faculty; today, many institutions are as involved in trying to retain their most senior faculty who may elect to retire. Similarly, the apparent standards for reappointment differ among institutions over time. Table IV contains data on the proportion of faculty who remained on the faculty from 1988-89 to 1989-90 by category, affiliation, and academic rank. It shows that 89.8 percent of the 1988-89 faculty remained there for the 1989-90 academic year; to put it another way, 10.2 percent of the 1988-89 faculty turned over by 1989-90. One way to interpret these numbers is to recognize that, if 10 percent of the faculty turn over every year, in ten years the institution would have the equivalent of an entirely new faculty.

Faculty retention was highest at Category I and IIA institutions; 90.8 percent and 91.1 percent, respectively, of the faculty were still there in 1989-90. Faculty retention rates were noticeably lower at Category IIB and III institutions. When considered by institutional affiliation, faculty retention rates are much lower at the private independent institutions than at the public institutions for each faculty rank. The data indicate that there is more mobility from private institutions at the senior, as well as the junior, ranks. Since there are no data on the reasons why senior faculty left their institutions, it is not possible to distinguish whether the senior faculty at private independent institutions are closer to retirement age or more professionally mobile than their colleagues at the public institutions. Other studies have reported that salary is the single most important determination of institutional differences in faculty retention rates.

By rank, turnover was the greatest for assistant professors, as might be imagined. A retention rate of 84.2 percent for assistant professors implies a complete turnover of assistant professors within seven years, arising either from promotion, resignation, or nonrenewal. One of the major reasons for the difference in the rates of retention between faculty at the assistant professor and associate professor ranks, 84.2 percent versus 94.7 percent, is that almost all of the turnover among associate professors is voluntary, seldom the result of an institution's nonrenewal decision.

Retirement and death are the major factors causing turnover at the full professor rank, although many move to other institutions, even after reaching 60 to 65 years of age, according to some reports.

Extensive data on age, salary, and gender for more than 30,000 faculty at 40 selected institutions are reported in Tables V and VI. These data provide the reader with an enriched perspective on the relation between salary, rank, age, and institutional category for men and women. At these institutions, the average age of men is five years more than that of the women. More interestingly, the data also indicate that, while the average age of women who are full professors is less than that of male full professors at each of the three categories of institutions, the average age of women assistant professors is above that of male assistant professors. The slightly higher average age of women at the assistant professor rank may reflect the fact that the average age at receipt of the doctorate degree is almost two years more for women than men.

The rank structures of male and female faculty are each the inverse of the other. The structure for male faculty is

shaped like a mushroom, with a large top; the structure for women looks more like a pyramid, with a large base. For all categories combined, 53.6 percent of the men are full professors, with about as many who are associate as assistant professors. Only 19.9 percent of the women are full professors; the most common rank, by far, is assistant professor. The same rank structures appear at the three different categories. Typically, half the male faculty are full professors; between one-fifth and one-fourth of the women are.

While the data illustrate the relation between age and salary, they also show that age is not a complete explanation of the differences in average salaries between men and women. For example, male full professors at Category I institutions earn an average salary nearly \$8,100 greater than that of their female colleagues, and average two years older; male associate professors at those institutions earn over \$3,400 more than their female colleagues but are, on average, younger. It may be worth noting that at the Category IIB liberal arts colleges, men and women at the associate and assistant professor ranks are essentially equal in average age and average salary. The fact that, in the academic profession as a whole, women faculty are on average younger than men is only a partial explanation of why the overall average salaries for men are higher than for women, but the data in Table V may assist in measuring the relative importance of the age differences.

The structure of the age distribution of the faculty in the selected sample described above is depicted in Table VI. The data show that, not only is the median age of male faculty higher than that for female faculty, 48 versus 43, but that the age distribution of women is more compressed than that of men. Half the women are between the ages of 38 and 51; half the men are between 38 and 55. Although 16 percent of all faculty are 60 years of age or older, only 7 percent of the women are that close to retirement. One advantage of this table is that it shows the age distribution of faculty, such that one can observe that one-third of male faculty are 55 years of age or older, more than twice the proportion of women. Similarly, only one-fourth of the men are less than 39 years old, but one-third of the women are.

Some indication of the rate at which faculty are promoted can be gained from an examination of the age distribution columns. Ten percent of the male full professors are younger than 44, but 16 percent of the women full professors are that young. On the other hand, 23 percent of male assistant professors are 40 years of age or older, but 38 percent of the female professors are of that age.

CURRENT STATISTICS

The data in Table 1 show that, while the overall average increase in salary levels was 6.1 percent at institutions with faculty ranks, it was least at Category IIB baccalaureate colleges and highest for Category II A comprehensive institutions. Average increases in salary at the public institutions lagged noticeably behind increases at the private independent colleges and universities, 6.0 percent versus 6.8 percent. This gap comes on top of the same kind of a difference last year. However, this year the difference is of greater national concern because it is particularly and unusually wide at the Category I major doctorate-granting institutions, where average salary increases were 7 percent at the private independent institutions but only 5.9 percent at the public universities.

The overall salary increase for continuing faculty, with rank, was 7.3 percent, larger, as usual, for faculty at the assistant professor rank and least for faculty at the full professor rank. Here again, continuing faculty at the private independent institutions received larger increases than did faculty

at the public institutions. Among continuing faculty at the Category I institutions, the average increase, for all ranks, was largest at the church-related institutions. It should be a matter of worry that the average increase in salary for continuing faculty of all ranks was lowest at the research-and-development oriented Category I institutions.

Table 2 provides some insight into why the public institutions fared as poorly as they did compared to the private independents. It shows, first, that twice as many public institutions as private independents provided salary increases to their continuing faculty of less than 3 percent, i.e., 5 percent versus 2.6 percent, and, second, that while less than half of the public institutions provided increases of 7 percent or more, nearly two-thirds of the private institutions did that well. At the private independent institutions, less than one percent of the faculty received increases less than the rate of inflation, but 6.3 percent of the faculty at public institutions suffered real losses in purchasing power. Secondly, it also shows that 5.1 percent of the continuing faculty members at public institutions received average increases of less than 3 percent, compared with one-half of one percent of the continuing faculty at private independent institutions. However, proportionately more faculty at public institutions than at private independent institutions received increases of 10 percent or more. Thus it appears as if a number of smaller public institutions are having severe difficulty in the competition to reward and retain faculty.

Salaries and compensation, by category and affiliation, are reported in Table 3. It shows that the average salary for all faculty, with rank, is \$41,650. The overall average salary for professors is 35 percent higher than that for associate professors, which is, in turn, 20 percent more than the average salary for assistant professors. The relative differences between ranks are larger at the Category I institutions and smallest at the Category IIB colleges among four-year institutions.

Average compensation for all faculty, with rank, is \$51,400. Both average salary and average compensation are higher at the private independent institutions than the public ones; the relative spread is about one percentage point larger for compensation than salary. One consequence of the continuing smaller average increases at the public institutions is that now, at the Category I institutions, average salaries of the private independent institutions are 18 percent higher than at the public universities, and average compensation is 19.6 percent higher.

Average salaries for men and women by category, affiliation, and rank are shown in Table 4. It shows that the average salaries for men are generally higher than those for women. The average salary for male full professors is \$54,340, which is 13 percent more than the average salary for female full professors of \$48,080. The relative differences in average salaries for men and women at the associate and assistant ranks is 7 and 9 percent, respectively. Some of the smallest differences in average salaries between men and women appear at the associate professor rank among public institutions where, for example, there is less than a one percent difference at the Category IIB baccalaureate institutions, and less than a 4 percent difference at the large Category I universities.

The importance of region as a determinant of nominal average salaries is highlighted in Table 5. Although the Pacific region now pays the highest overall average salary for faculty with rank, among the Category I doctoral institutions the highest salaries are still paid in New England. The regional differences in average overall salaries are larger than would be expected based on simple cost-of-living differences. The overall average salary of \$48,230 in the Pacific region is 35 percent higher than the \$35,730 paid in the East South Cen-

¹Sample includes 30,019 full-time faculty members (23,699 men and 6,320 women) in 40 institutions (26 category I with 27,546 faculty; 3 category IIA with 463 faculty; and 11 category IIB with 1,741 faculty members). These institutions are part of an historical group of 41 institutions. Salary data have been published in aggregate form in the AAUP Annual Report from 1939-40 thru 1969-70 for this group known as the "Biennial Survey Institutions."

tral states. Part of that difference must reflect a difference in philosophy toward postsecondary education. The column on compensation in Table 6 tells the same story, if slightly more pointed, since the relative proportion of fringe benefits tends to increase as average salary increases.

The actual distribution of 1989-90 average salaries of institutions, by category and rank, are described in Table 7. It shows, for example, that the top fifth of salaries, rated 1 in the following Appendix, for professors at Category I, IIA, and IIB institutions were \$65,200, \$53,300, and \$45,000, respectively. The table also indicates that the distribution of average salaries for assistant professors is most spread out at the Category IIB colleges. The distribution of average compensation appears in Table 8. At Category I institutions, it would take an average compensation of more than \$80,500 for full professors for the institution to rank in the top 20 percent and receive a 1 in the compensation ratings.

Tables 9 and 10 report average fringe benefits by benefit and as a proportion of salary. The two largest fringes remain retirement and social security, which together constitute approximately two-thirds of the total amount spent on benefits. Since all "fringes," combined, now provide 23.4 percent more dollars beyond salary, they ought not to be regarded as merely "fringes." The rising importance of medical insurance is clear.

According to the data reported in Table 11, the proportion of faculty with tenure is slightly higher at the public than at the private independent institutions, i.e., 65 percent versus 63 percent. The table also illustrates that relatively more women than men hold tenure at the assistant professor rank, especially at public institutions. For example, at the public institutions, 19 percent of the male assistant professors are tenured and 23 percent of the female assistant professors are tenured, suggesting that women were not promoted into the associate professor rank as rapidly as men. The differences are especially worrisome since, as the data in Table 12 show, a smaller proportion of women hold tenure-track appointments than do men. Table 12 also shows that 14 percent of the assistant professors are not on tenure-track appointments, an increase from last year. At the public institutions, 20 percent of all faculty are not on tenure-track appointments, compared to 18 percent last year.

The data in Table 13, describing the distribution of faculty by rank, show how far the distribution has been stretched from the historical situation when most faculty were either at the assistant or full-professor rank, with very few associate professors. The new shape, with more associate than assistant professors, reflects a slowdown in the rate of promotion to full professor. More than 40 percent of the faculty at Category I institutions are full professors, except for the church-related universities.

Much of the data in the earlier tables is summarized differently in Table 15. They reflect the unusually high response rate to the survey reported in Table 14. For example, the top rows of Table 15 show that 65 percent of the faculty is tenured, and that a larger proportion of the faculty is tenured at Category I institutions than at either Category IIA or IIB institutions, reflecting the higher proportion of full profes-

sors at the large doctorate-granting institutions.

For the 348,738 faculty in the survey, the average salary was \$46,870. Considering only the four-year institutions (Categories I, IIA, IIB), the 290,460 faculty earned an average salary of \$42,200 and an average compensation of \$52,020.

Table 16 reports the distribution of faculty by gender, category, and institutional affiliation. The first two columns show that 72.6 percent of the full-time faculty are men, half of whom are full professors. The table also shows that half (50.8 percent) of all faculty are men teaching at public institutions. The data also indicate an increase in the number of women entering (and promoted within) the profession among all types of institutions. Yet, it remains a fact that there are about ten times more men than women who are full professors at the Category I institutions.

Tables 17 through 20 report salary data for faculty in the health professions. These data, like those in Table III, come from other sources than our own survey, but are comparable.

THE COMMITTEE

The number of institutions that responded to this year's survey is the largest in recent memory. The Committee is very pleased that so many institutions provided the necessary data for giving this report the respect it enjoys. We recognize that institutional officers were faced with many competing demands this year, so the academic community is especially appreciative of their willingness to answer the questionnaires sent out by Maryse Eymonerie Associates. A special note of appreciation is sent to those selected institutions which provided data on faculty ages so that we could draw a representative picture of the dynamics of an academic career.

It is a pleasure to again express the Committee's appreciation to Maryse Eymonerie for her patience, dedication, and wisdom in bringing this year's survey to its very timely conclusion. Over the past half-dozen years, the publication of Committee Z's report has come continuously earlier in the spring. Earlier publication increases its usefulness to faculty and others engaged in budgetary planning.

Finally, I want to express my personal appreciation to everyone in the academic community who has taken the time to comment on and criticize the ideas behind the language in the most recent reports. I appreciate, too, the willingness of the other members of Committee Z for taking time to worry about the economic status of the profession: Ronald Ehrenberg (Cornell University), Susan Vroman (Georgetown University), Daniel S. Hamermesh (Michigan State University), and Debra Barbezat (Amherst College); also W. Lee Hansen (University of Wisconsin, Madison). At one time or another during my tenure as Committee Z chair I have, also, called upon several of those who chaired the Committee in the past, and I must express my appreciation to them for their full support.

¹Interpretation of the Ratings: 1* = 95th percentile; 1 = 80th percentile; 2 = 60th percentile; 3 = 40th percentile; 4 = 20th percentile.
Average compensation lower than the 20th percentile will be rated 5.

TABLE 9

Average Fringe Benefits in Dollars and as a Percentage of Average Salary, by Affiliation and Itemized Benefits, 1989-90 (All Ranks Combined)

Itemized Benefits	All Combined	Private Public	Church- Independent Related	All Combined	Private Public	Church- Independent Related		
	IN DOLLARS				AS A PERCENTAGE

Benefits in Kind	91	80	121	106	0.2	0.2	0.3	0.3
All Combined	9,764	9,768	10,846	8,113	23.4	23.3	24.1	23.2

Notes: For the purpose of this survey, the Social Security tax has been calculated at 7.51 percent of the first \$48,000 of salary; retirement contribution by the institution (or state) is included regardless of the plan's vesting provision; tuition includes both waivers and remissions; dental insurance might be somewhat underestimated because a number of institutions report cost of the insurance under "medical." Similarly, the medical insurance payments might be somewhat overestimated because dental is sometimes included in the amount reported. For the majority, benefits in kind include moving expenses, housing, and other benefits with cash options. In the case of the public four-year institutions in Texas, it also includes the portion of the employee's contribution to Social Security that is paid by the state. For more details on the reporting of fringe benefits, see Explanation of Statistical Data preceding Appendix I. Averages for All Combined may not add up because of rounding. Sample includes Categories I through III institutions providing itemized benefits.

¹Sample includes 1,672 institutions (Categories I through III) providing data by gender. Total number of faculty members is 311,242 of whom 85,419 (or 27.4 percent) are women. For institutions without ranks (Category IV), 33.6 percent of all full-time faculty members are women. Total (All Combined) may not add up because of rounding.

EXPLANATION OF STATISTICAL DATA

Instructional Faculty. The instructional staff faculty is defined as those members of the instructional/research staff who are employed on a full-time basis and whose major regular assignment is instruction, including those with released time for research. Institutions are asked to exclude (1) instructional faculty who are employed to teach less than two semesters, three quarters, two trimesters, or two four-month sessions, (2) instructional faculty in preclinical and clinical medicine, (3) instructional faculty who are employed on a part-time basis, (4) administrative officers with titles such as dean of students, librarian, registrar, coach, etc., even though they may devote part of their time to classroom instruction and may have faculty status, (5) undergraduate or graduate students who assist in the instruction of courses, but have titles such as teaching assistant, teaching fellow, etc., (6) faculty on leave without pay, and (7) replacement of faculty on sabbatical leave.

Salary. This figure represents the contracted salary excluding summer teaching, stipends, extra load, or other form of remuneration. Where faculty members are given duties for eleven or twelve months, salary is converted to a standard academic-year basis by applying a factor of 9/11 or 81.8 percent or by the official factor used in a publicly announced formula which is reflected in a footnote in the Appendix Tables of this report.

Major Fringe Benefits. In general, the major fringe benefits include those where the institution (or state) makes a definite payment of a specified amount on behalf of and for the benefit of the individual faculty member. The major benefits include the institution's (or state's) contribution for: (1) Social Security (for consistency, the previously announced rate of 7.51 percent of the first \$48,000 of salary or that effective January 1989 has been used in calculating these payments), (2) retirement contributions (the employer's contributions are included regardless of the plan's vesting provision), (3) medical insurance, (4) dental insurance, (5) life insurance, (6) disability income protection, (7) unemployment compensation, (8) worker's compensation, (9) tuition for faculty children (both waivers and remissions are included), (10) other benefits in kind with cash alternatives (for the majority, these include benefits such as moving expenses, housing, cafeteria plans or cash options to certain benefits, bonuses, etc.). In the cases of public Texas four-year institutions, it also includes the portion of the employee's contribution to Social Security which is paid by the state or 5.85 percent of the first \$16,500 of salary. Since the objective of the study is the measurement of income available for personal consumption, as distinct from professional purposes, benefits of a professional nature (such as convention travel, membership fees, grading assistance, faculty clubs, etc.) are not included.

Compensation. Compensation represents salary plus the institution's (or state's) contribution to major fringe benefits.

Rating of Average Salary and Average Compensation. The rating is based on the actual distribution of average salaries and/or average compensations for comparable institutions. For definition of comparable institutions, see definition of categories and the explanation of ratings in Column (2) (below).

Definition of Categories. The definition of categories given here is that instituted by the Center for Education Statistics

and adopted by AAUP for its 1983-84 survey. The center subsequently abandoned this type of classification for a broader system. The roman numerals are used for the purpose of this report with the CES former identification given in parentheses. It should be noted that data on earned degrees were obtained from CES. Because these data have not been available in a timely manner, we ask institutions to assign their own category based on the most recent information available.

Category I (Doctoral-Level Institutions). These are institutions characterized by a significant level and breadth of activity in and commitment to doctoral-level education as measured by the number of doctorate recipients and the diversity in doctoral-level program offerings. Included in this category are those institutions which grant a minimum of thirty doctoral-level degrees annually. These degrees must be granted in three or more unrelated disciplines.

Category IIA (Comprehensive Institutions). These institutions are characterized by diverse post-baccalaureate programs (including first professional), but do not engage in significant doctoral-level education. Specifically, this category includes institutions not considered specialized schools in which the number of doctoral-level degrees granted is fewer than thirty or in which fewer than three unrelated disciplines are offered. In addition, these institutions must grant a minimum of thirty post-baccalaureate degrees and either grant degrees in three or more post-baccalaureate programs or, alternatively, have an interdisciplinary program at the post-baccalaureate level.

Category IIB (General Baccalaureate). These institutions are characterized by their primary emphasis on general undergraduate baccalaureate-level education. These institutions are not significantly engaged in post-baccalaureate education. Included in this category are institutions which are not considered as specialized and in which the number of post-baccalaureate degrees granted is fewer than thirty or in which fewer than three post-baccalaureate-level programs are offered and which either (a) grant baccalaureate degrees in three or more program areas, or (b) offer a baccalaureate program in interdisciplinary studies.

Category III (Two-year Institutions with Academic Ranks). These institutions confer at least 75 percent of their degrees and awards for work below the bachelor's degree.

Category IV (Institutions without Academic Ranks). The majority of these institutions are two-year colleges (see definition of Category III) but do not utilize academic ranks. This category also includes a few general baccalaureate institutions which do not use academic ranks. These institutions are listed in Appendix II of this report.

Definition of data presented in Appendices I and II:

Col. (1) Institution's category—The definition of categories is given above.

Col. (2) Ratings of Average Salary—Each rating represents the percentile interval in which the institution's average salary in a given rank lies (1* = 95th percentile or above, 1 = 80th percentile to 94.9 percent, etc.). An average salary lower than the 20th percentile is rated 5. The ratings have been assigned

using the actual average salary which is then rounded to the nearest hundred for publication in Col. (3).

Col. (3) Average Salary by Rank and for All Ranks Combined—This figure represents the average contracted salary (adjusted to a standard academic-year basis, when necessary) excluding summer teaching, extra load, etc., which has been rounded to the nearest hundred dollars; an entry of 43.3 would stand for an average salary between \$43,250 and \$43,349. The All Ranks (AR) figure includes the rank of lecturer and the category No Rank which are not displayed here.

Col. (4) Rating of Average Compensation—Same definition as that given for Col. (2) above, but for compensation which is salary plus fringe benefits.

Col. (5) Average Compensation by Rank and for All Ranks Combined—This figure represents the average salary plus average fringe benefits and, as for average salary, the figure has been rounded to the nearest hundred dollars.

Col. (6) Benefits as a Percentage of Average Salary—This percentage, which has been rounded to the nearest unit, represents the overall percentage of fringe benefits as a percentage of average salary for all ranks combined. Major fringe benefits are the institution's (or state's) contribution excluding employee's contribution.

Col. (7) Percentage of Tenured Faculty—This figure represents the percentage of tenured faculty in a given rank.

Col. (8) Percentage Increase in Salary for Continuing Faculty—The percentage increase in salary shown here is that for continuing faculty or faculty members remaining on staff in 1989-90. This figure represents an increase in salary for individuals as opposed to a percentage change in salary levels for a given rank from 1988-89 to 1989-90. For the purpose of reporting this information, the institution is asked to provide data by rank but to report, in the case of promotion, the individual in the rank held in 1988-89. Therefore, the increase shown is that of individuals in the rank held during the 1988-89 academic year. This figure reflects across-the-board, merit increase, promotion and/or other salary increments.

Col. (9) Number of Faculty Members by Rank and by Gender—This number represents the total number of full-time faculty in a given rank.

Col. (10) Average Salary by Rank and by Gender—These figures, like those in Col. (3), have been rounded to the nearest hundred dollars. The average is not shown and is replaced by dashes when the number of individuals in a given rank and/or gender is five or fewer.

Cautionary Notes

With the exception of the number of faculty members shown in Col. (9), other data are not given in any given rank and/or gender when the number of individuals is five or fewer. This policy was adopted to protect the confidentiality of individual salaries and because an average with so few individuals could be misleading when used for comparison purposes. In such cases, dashes appear in the affected columns.

Average Salary and Average Compensation are likely to be affected by a number of peripheral influences. For example, an institution may use a high proportion of part-time graduate assistants whose compensations are not included in the average figures for full-time faculty. Figures for these institutions, therefore, overstate the typical remuneration of those who carry the teaching burden. Average figures for small institutions may also be influenced by the fact that in a given year a relatively large number of their higher paid faculty may be on leave without pay or may have retired. In addition, actual improvements in the economic well-being of the faculty may be concealed in any given year by promotions, which can exercise a double-edged effect upon the average reported in both the higher and lower ranks. The differences between men's and women's salary levels may sometimes be attributed to the relatively large proportion of men in a given rank (see Table 14) and other factors affecting salary levels. Unfortunately, we have found no feasible way to make appropriate adjustments for these occurrences and can only warn the reader to keep these points in mind when using these data.

Institutional footnote numbers are given in the Appendix Tables between the name of the institution and its category. The footnotes for both Appendix I (institutions with academic ranks) and Appendix II (institutions without ranks) are listed at the end of Appendix II.

The following symbols shown under "notes" in the Appendix Tables stand for: PNA = Publication Not Authorized and LFO = Data are for Lay Faculty Only.

The data presented in this report are based on information provided by institutions responding to the annual survey conducted by Maryse Eymonerie Associates for the purpose of the AAUP Annual Report on the Economic Status of the Profession. We continue to be very grateful to those individuals who prepare the institutional responses and complete our questionnaire (Form MEA22). We deeply appreciate the assistance and cooperation given us over the years in connection with this important program.

MARYSE EYMONERIE
Special Consultant to AAUP

NOTES TO APPENDICES I AND II

For the purpose of this survey, 12-month salaries are converted to a standard academic-year basis. A factor of 9/11 (or 81.8 percent) is used except when an institution provides a different formula. The first twenty-four notes are used to indicate which formula has been used for a specific institution.

1. A factor of 75.0
2. A factor of 76.9
3. A factor of 80.0
4. A factor of 83.3
5. A factor of 85.7
6. A factor of 90.0
7. A factor of 86.0
8. A factor of 86.2
9. A factor of 84.8
10. A factor of 86.4
11. A factor of 86.9
12. A factor of 90.9
13. A factor of 92.3
14. A factor of 87.5
15. A factor of 91.7
16. A factor of 91.1
17. A factor of 76.3
18. A factor of 76.6
19. A factor of 78.0
20. A factor of 71.4
21. A factor of 82.2
22. A factor of 83.0
23. A factor of 94.7
24. A factor of 84.2
25. Data shown under "Men" are for men and women combined.
26. The retirement component does not include the contribution made for unfunded retirement liability.
27. The compensation figures also include a portion of the employee's contribution to the Federal Social Security Program which is paid by the state (5.85 percent of first \$16,500 of salary).
28. Actuarial valuations are prepared annually to determine state's contributions as required by law. This year, contribution is "zero" as compared to 2.3 percent for 1988-89. A factor of 85.5 percent was used to convert 12-month salaries to standard academic-year basis.
29. A factor of 75.0 percent was used in converting 12-month salaries to standard academic-year basis. See note 27.
30. Data provided by the Chancellor's Office of the California Community Colleges. Data shown under "Men" are for men and women combined. Benefits have been estimated.
31. Data do not reflect the equity adjustments.
32. *Air Force Institute of Technology*—Fringe benefits estimates were based on previous year's information and rates used by other federally controlled institutions.
33. *Alverno College*—After five years of employment, faculty are granted continuous employment rather than tenure. A factor of 75.0 (9/12) was used to convert 12-month salaries to standard academic-year basis.
34. *American University*—Annual raises become effective at the start of the spring semester; therefore, the figures shown include one-half of the annual raise.
35. *Antioch University*—Data also include Antioch Southern Calif. Region, Antioch College, SAEL, Antioch, Pa., Antioch New England, and Antioch Seattle.
36. *Austin Community College*—Data also include Rio Grande, Riverside, Northridge, Southwest Center, Rutherford, and Oaks campuses. See note 1.
37. *Black Hawk College*—Data for Quad Cities, Kewanee, and Moline campuses.
38. *Blinn College*—Data are for Brenham, Bryan, College Station, and Bastrop campuses.
39. *Caribbean University College*—Data include Bayamon, Carolina, Vega Baja, and Ponce campuses.
40. *Catonsville Community College*—Data include Catonsville and Carroll Community Colleges.
41. *Central Community College*—Data do not reflect 1989-90 salary increase under negotiation at time of submission. A factor of 84.2 was used to convert contracts other than 9-month to standard academic year.
42. *Clark County Community College*—Data include Las Vegas, Cheyenne, Henderson, and West Charleston campuses.
43. *Cochise College*—Data include the Douglas and Sierra Vista campuses. A factor of 9/12 or 75.0 percent was used to convert 12-month data to standard academic-year basis.
44. *College of William and Mary*—Data also include Virginia Institute of Marine Science.
45. *Columbia University*—Data do not include Applied Science faculty.
46. *Community College of Allegheny County*—Data include Allegheny, Boyce, South, and North campuses.
47. *Cornell University (Endowed Colleges)*—Data include the College of Architecture, Art, and Planning, Arts and Sciences, Engineering, School of Hotel Administration, Law School, Johnson Graduate School of Management, and African Studies and Research Center.
48. *Cornell University (Statutory Colleges)*—Data include College of Agricultural and Life Sciences, Human Ecology, Industrial and Labor Relations, and Veterinary Medicine.
49. *Daytona Beach Community College*—Data include Daytona Beach, West, South, and Flagler/Palm Coast campuses.
50. *D'Youville College*—Data do not reflect a salary increase of 8.3 percent under negotiation at time of submission.
51. *Eastern Iowa Community College District*—Data include Scott, Muscatine, and Clinton Community Colleges.
52. *Eastern Montana College*—Data reflect a 6 percent across-the-board increase but negotiations were not completed at time of submission.
53. *El Paso Community College District*—Data also include Valle Verde, Rio Grande, and Transmountain campuses. See note 1.
54. *Embry-Riddle Aeronautical University*—Data include Daytona Beach, Fla., and Prescott, Ariz., campuses. See note 3.
55. *Erie Community College*—Data include Erie, South, North, and City campuses.
56. *Fairleigh Dickinson University*—Data include Rutherford, Teaneck, and Madison campuses and Williams College. See note 4.
57. *Fontbonne College*—Data include Chrysler Plant in Fenton and O'Fallon, Mo., faculty.
58. *Fordham University*—Data also include Rose Hill, Bronx, Lincoln Center, Manhattan, and Marymount Tarrytown campuses.
59. *Friends World College*—Data include Huntington, N.Y.; Kyoto, Japan; London, England; Bangalore, India; San Jose, Costa Rica; Machakos, Kenya; and Jerusalem, Israel.
60. *Front Range Community College*—Data include Westminster and Larimer County Center in Fort Collins.
61. *Gallaudet University*—Retirement component includes the portion paid directly by the federal government.
62. *Gannon University*—Data also include Villa Maria College faculty (merged July 1, 1989).
63. *Garrett Community College*—Data also include Oakland Center.
64. *George C. Wallace State College, Selma*—Data include Selma and Clanton campuses.
65. *Golden Gate University*—Data also include the Fort Myer, Va., campus.
66. *Grace Schools, Inc.*—Data also include Grace Seminary, West campus, Long Beach, Calif.
67. *Greenfield Community College*—No salary increase given since September 1988. Current collective bargaining contract expired June 30, 1989. No determination on salary increase at time of submission.
68. *Grossmont/Cuyamaca College District*—Data include Grossmont and Cuyamaca Colleges and do not reflect 1989-90 salary increase.
69. *Hamline University*—Data do not include Law faculty.
70. *Hebrew Union College*—Data include Cincinnati, Los Angeles, and New York campuses. Because Hebrew Union, which is predominantly a graduate institution, has a very substantial portion of its faculty at the full-professor level at the top of the scale, average salary/compensation reflects an upward skewing that can be deceptive.
71. *Houghton College*—Data also include the Buffalo suburban campus.
72. *Howard Payne University*—Data also include Corpus Christi Learning Center.
73. *Idaho State University*—Data also include Vocational Tech Education faculty.
74. *Illinois Eastern Community Colleges*—Data include Frontier, Lincoln Trail, Olney Central, and Wabash Valley colleges. A factor of 9/12 (or 75.0 percent) was used to convert data to standard academic-year basis.
75. *Indian Hills Community College*—Data include Ottumwa, Ottumwa Airport, and Centerville campuses.
76. *Indiana University of Pennsylvania*—Data include Indiana, Armstrong, and Punxsutawney campuses. See note 26.
77. *Iowa Lakes Community College*—Data include Estherville and Emmetsburg centers.
78. *Iowa Valley Community College District*—Data include Ellsworth and Marshalltown Community Colleges.
79. *J. Sargeant Reynolds Community College*—Data also include Downtown, Parham Road, and Western campuses.
80. *Lansing Community College*—Data shown under "Men" are for both men and women. A factor of 82.2 percent was used to convert 12-month data to standard academic-year basis.
81. *Lewis-Clark State College*—Data include academic and vocational faculty.
82. *Lincoln College*—Data include Lincoln and Normal campuses.
83. *Linfield College*—Data also include the Portland campus.
84. *Loma Linda University*—Data include Loma Linda and Riverside campuses.
85. *Long Island University*—Data include C.W. Post, Brooklyn, Southampton, Brentwood, and Rockland campuses.
86. *Los Angeles College of Chiropractic*—Data include main campus plus satellite clinics.
87. *Louisiana State University and A & M College*—Data also include Louisiana State University Agricultural Center and Hebert Law Center.
88. *Loyola Marymount University*—Data also include Loyola Law School.
89. *Madonna College*—In late 1970s, the college converted from standard tenure to a multi-year contract system.
90. *Manatee Community College*—Data also include Bradenton and South campuses. A factor of 71.4 percent was used to convert 12-month data to standard academic-year basis.
91. *Marin, College of*—Data also include Kentfield and Indian Valley campuses.
92. *Mercer University*—Data also include the Law School, N.E. campus in Atlanta, and Pharmacy School in Atlanta.
93. *Metropolitan Community Colleges*—Data include Longview, Maple Woods, and Penn Valley Community Colleges.

94. *Metropolitan Community College*—Data include Omaha, Fort Omaha, Elkhorn Valley, and South Omaha campuses. See note 17.
95. *Mid-Plains N.E. Technical Community College*—Data also include McCook Community College.
96. *Middlesex Community College*—Data apply to Burlington, Bedford, and Lowell campuses. Data do not reflect the 1989-90 salary increase.
97. *Midlands Technical College*—Data also include Airport and Beltline campuses.
98. *Milwaukee Area Technical College*—Data include the main campus at Milwaukee and the South, North, and West campuses.
99. *Mississippi Gulf Coast Community College*—Data include Perkinston, Jefferson Davis, and Jackson County campuses. A factor of 90 percent was used to convert data to standard academic-year basis.
100. *Mohawk Valley Community College*—Data include Utica and Rome campuses.
101. *Mount Wachusett Community College*—Data do not reflect the 1989-90 salary increase.
102. *National College of Education*—Data include Evanston, Chicago, and Lombard, Ill.; St. Louis, Mo.; Beloit and Milwaukee, Wis.; McLean, Va.; Tampa, Fla.; and Seeheim, West Germany campuses. A factor of 10/12 (or 83.3 percent) was used to convert 12-month data to standard academic-year basis.
103. *North Harris County College District*—Data also include East and South campuses.
104. *North Shore Community College*—Data include both the Beverly and Lynn campuses.
105. *Northeastern University*—Salary increases reflect a 3 percent equity raise across the board which, at the time of submission, was in the process of being allocated. When actually posted, the raise may not be evenly across all ranks. A factor of 85.6 was used to convert 12-month data to standard academic-year basis.
106. *Northern State University*—The 1988-89 percentage increases in salary for continuing faculty published in last year's report were erroneous. These should have been 4.0, 3.3, 3.5, and 2.7 for professor, associate, assistant, and instructor ranks, respectively.
107. *Northwestern Michigan College*—Data include Traverse City and Cadillac campuses.
108. *Norwalk Community College*—Data also include J.M. Wright Technical School.
109. *Norwich University*—Data also include the Military College of Vermont and Vermont College.
110. *Oakland City College*—Data also include Bedford College Center.
111. *Pace University*—Data include New York, White Plains, and Pleasantville excluding the School of Law faculty.
112. *Pennsylvania College of Technology*—Formerly known as Williamsport Area Community College.
113. *Pennsylvania State University, IIA Campuses*—Data include Erie-Behrend, Harrisburg-Capital, and Great Valley Center. See note 26.
114. *Pennsylvania State University, III Campuses*—Data include Allentown, Altoona, Beaver, Berks, Delaware, DuBois, Fayette, Hazleton, McKeesport, Mont Alto, New Kensington, Ogontz, Schuylkill, Shenango, Valley, Wilkes-Barre, Worthington, Scranton, and York campuses. See note 26.
115. *Pfeiffer College*—Data also include the Charlotte campus.
116. *Pima Community College*—Data also include West, Downtown, and East campuses.
117. *Point Loma Nazarene College*—Data include Point Loma and Pasadena campuses.
118. *Providence College*—Data apply to lay faculty only.
119. *Fundacion Educativa Ana G Mendez*—Data include Univ. Metro., Univ. del Turado, and Puerto Rico College.
120. *Redwoods Community College District*—Data include Eureka, Mendocino, and Del Norte campuses.
121. *Roger Williams College*—Data include Bristol and Providence campuses.
122. *Rollins College*—Data include Winter Park and Brevard campuses.
123. *Sage JCA*—Formerly known as Albany Junior College.
124. *Saint Joseph's College*—Data apply to lay faculty only.
125. *Saint Peter's College*—Data also include Englewood Cliffs campus.
126. *Salt Lake Community College*—Data also include the Riverside campus. See note 3.
127. *San Jacinto College District*—Data include San Jacinto College Central, North, and South campuses.
128. *Seton Hall University*—Data include South Orange campus and Law School.
129. *Southeast Community College*—Data include Beatrice, Lincoln, and Milford campuses.
130. *Southern College of Seventh-Day Adventists*—Data are for Collegedale, Tenn., and Orlando, Fla., campuses.
131. *Southern Union State Junior College*—Data include the Wadley, Valley, and Opelika campuses.
132. *SUNY at Buffalo*—Data also include the Health Sciences faculty.
133. *SUNY at Stony Brook*—Data also include the Health Sciences faculty. The 1988-89 data inadvertently included a group of hospital employees. While it did not affect the averages by rank, the "All Ranks Combined" salary and compensation should have been 50.7 and 63.5, respectively.
134. *Stetson University, John B.*—Data include DeLand and St. Petersburg campuses.
135. *Syracuse University*—Data also include College Center of the Finger Lakes, Mid-Hudson, Rome, and Endicott-Owego Graduate Centers.
136. *Technical College of the Lowcountry*—Data also include Hampton Extension and Hilton Head Center.
137. *Tennessee State University*—Data also include the Avon N. Williams campus.
138. *Texas Woman's University*—Data include Dallas, Denton, and Houston campuses. See note 27.
139. *Transylvania University*—Substantial supplements for excellence in teaching not included in salary but reflected in compensation.
140. *Trinity Valley Community College*—Data include Henderson-Athens, Anderson County-Palestine, Kaufman County-Terrell, Health Science Center-Kaufman.
141. *Troy State University*—Data also include Troy, Nursing, and Phenix City campuses.
142. *Tufts University*—Data include Arts and Sciences, Fletcher School, School of Dentistry, and School of Veterinary Medicine.
143. *Union College*—The average compensation for the ranks of assistant, instructor, and all ranks published in the 1988-89 annual report should have been shown as 38.0, 32.8, and 52.8, respectively.
144. *University of Alabama, Birmingham*—Data apply to University of Alabama General Schools.
145. *University of Alaska, Anchorage*—Data include Anchorage campus and Kenai, Peninsula, Kodiak, and Matanuska-Susitna campuses.
146. *University of Alaska, Fairbanks*—Data include Fairbanks campus, and Chukchi, Kuskokwim, and Northwest campuses.
147. *University of Alaska, Southeast*—Data include Juneau, Ketchikan, and Sitka campuses.
148. *University of Chicago*—The 1988-89 average compensation by rank should have been 84.9, 56.4, 47.6, and 38.2 for professor, associate, assistant, and instructor, respectively. All ranks combined (69.6) unchanged.
149. *University of Denver*—Average compensations published in 1988-89 annual report should have been 58.4, 44.1, 36.1, 37.4, and 46.9 for professor, associate, assistant, and all ranks combined, respectively. Benefits were overestimated due to an error in computing unemployment compensation tax.
150. *University of Detroit*—Data include main campus and Renaissance and Dental School campuses.
151. *University of Lowell*—Data do not reflect the 1989-90 increases under negotiation at the time of submission.
152. *University of Massachusetts, Amherst*—Salary increase includes a 2.6 percent merit increment retroactive to September 1988.
153. *University of Miami*—Data include Coral Gables and Key Biscayne (ASMAS) faculty.
154. *University of the Pacific*—Data also include the School of Dentistry, San Francisco, and McGeorge School of Law, Sacramento.
155. *Puerto Rico-Humacao University College*—Data do not include faculty with less than 9-month contracts.
156. *University of Rhode Island*—Data also include Narragansett Bay campus.
157. *University of Rochester*—While compensation figures are comparable to those published in previous years, the reinstatement of the institution's contribution to the retirement plan affects salary figures which until this year included an increment in salary in lieu of retirement contribution. This practice is no longer in effect.
158. *University of Saint Thomas*—Data also include School of Theology and Saint Mary's Seminary.
159. *University of South Alabama*—Data also include the Baldwin County campus.
160. *University of Southern Mississippi*—Data also include the Gulf Coast campus.
161. *Urbana University*—Data include Columbus, Dayton, Marysville, and Urbana campuses.
162. *Washington and Lee University*—Data do not include the Law School.
163. *Wenatchee Valley College*—Data also include North campus in Omak, Wash.
164. *West Virginia Northern Community College*—Data include Wheeling, Weirton, and New Martinsville campuses. See note 1.
165. *Western Conservative Baptist Seminary*—Data also include Western Seminaries in San Jose and Phoenix.
166. *Western Montana College*—Data do not include the 1989-90 salary increase under negotiation at time of submission.
167. *Western Nebraska Community College*—Data include Scottsbluff and Sidney campuses. A factor of 76.3 percent was used to convert 12-month salaries to standard academic-year basis.
168. *Whittier College*—Data also include the Whittier College School of Law.
169. *Wilmington College*—Data also include the Cincinnati Branch, Lebanon, and Warren Correctional campuses.
170. *Worcester State College*—Data do not reflect the 1989-90 increase that had not been negotiated at the time of submission.
171. *Yavapai College*—Data include Prescott, Verde, and Coconino Extension campuses.

CENSURED ADMINISTRATIONS

Investigations by the American Association of University Professors of the administrations of the institutions listed below show that, as evidenced by a past violation, they are not observing the generally recognized principles of academic freedom and tenure endorsed by this Association, the Association of American Colleges, and more than 125 other professional and educational organizations. The 1940 *Statement of Principles on Academic Freedom and Tenure* may be found in the January-February 1986 issue of *Academe*.

This list is published for the purpose of informing Association members, the profession at large, and the public that unsatisfactory conditions of academic freedom and tenure have been found to prevail at these institutions. Names are placed on or removed from this censure list by vote of the Association's Annual Meeting.

Placing the name of an institution on this list does not mean that censure is visited either upon the whole of the institution or upon the faculty, but specifically upon its present administration. The term "administration" includes the administrative officers and the governing board of the institution. This censure does not affect the eligibility

of nonmembers for membership in the Association, nor does it affect the individual rights of members at the institution in question.

Members of the Association have often considered it to be their duty, in order to indicate their support of the principles violated, to refrain from accepting appointment to an institution so long as it remains on the censure list. Since circumstances differ widely from case to case, the Association does not assert that such an unqualified obligation exists for its members; it does urge that, before accepting appointments, they seek information on present conditions of academic freedom and tenure from the Association's Washington office and prospective departmental colleagues. The Association leaves it to the discretion of the individual, possessed of the facts, to make the proper decision.

The censured administrations, with dates of censuring, are listed below. Reports were published as indicated by the parenthesized *Bulletin* or *Academe* citations following each listing. Reference should also be had to "Developments Relating to Censure by the Association" and to the "Report of Committee A," each of which appears annually in *Academe*.

South Dakota State College and Universities under South Dakota Board of Regents (September, 1961, 247-55)	1962
Censure was voted specifically on the South Dakota Board of Regents, with respect to a case which occurred at South Dakota State University. Censure was not directed against the local or central administrative officers. The 1982 Annual Meeting determined that the regents also now have sole responsibility with respect to a case which occurred in 1966 at Northern State College (September, 1968, 306-13).	
Grove City College (Pennsylvania) (March, 1963, 15-24)	1963
University of the Ozarks (Arkansas) (December, 1963, 352-59)	1964
Censure was voted specifically on the Board of Trustees, and not on the institution's administrative officers.	
Nebraska State Colleges (December, 1964, 347-54)	1965
Censure was voted specifically on the Board of Trustees of the Nebraska State Colleges, with respect to a case which occurred at Wayne State College. Censure was not directed against the local or central administrative officers.	
Amarillo College (Texas) (September, 1967, 292-302)	1968
Frank Phillips College (Texas) (December, 1968, 433-38)	1969
Central State University (Oklahoma) (March, 1969, 66-77)	1969
Southern Arkansas University (March, 1971, 40-49)	1971
Onondaga Community College (New York) (June, 1971, 167-74)	1972
Colorado School of Mines (March, 1973, 73-79)	1973

UPDATE

Association News and Developments in Higher Education

University of California Divided Over Proposed Incompetence Policy

A much-debated University of California proposed policy for dealing with grossly deficient performance by tenured faculty members that was deadlocked in the university senate has been referred to an academic senate task force. The policy, which has been widely reported in the media and praised by anti-tenure commentators, will not go into effect unless it receives senate approval.

The controversial proposal was embraced by the Berkeley division of the senate in February 1989. It would provide a detailed definition of incompetence and prescribe remedial actions, including possible dismissal, upon recommendation of an *ad hoc* review committee. The policy would apply to a faculty member who is found deficient in both research and teaching, one "who has ceased (or virtually ceased) to engage in serious scholarship or creative activity for a substantial period of time" and "whose teaching...is so inadequate that it is a disservice to students to permit the faculty member to continue to teach."

The framers of the policy claimed it was intended both to "safeguard tenure as an institutionalized protection of academic freedom" and to "validate the privilege of tenure by seeking not to protect extreme incompetence." The policy was vigorously opposed and defeated by a wide margin, however, in the Los Angeles (UCLA) division of the senate in March 1989. Agreeing with their Berkeley counterparts on the necessity of terminating the appointments of grossly incompetent faculty members, many speakers nevertheless labelled the Berkeley policy unnecessary (because university policy already provides for dismissal for "good cause") and a threat to academic freedom.

"I see no indication of a rising tide of gross incompetence, and hence little need for revision of the long-term standard for dismissal," said David Kaplan,

a professor of philosophy, during the senate meeting. Martin Shapiro, a professor of medicine, added that "the standard is so hopelessly vague that it could be applied to almost anyone at some time or another." Senate divisions at other campuses of the University of California voiced objections as well.

Last fall, responding to the conflict over the proposal, the senate referred the entire matter to a task force chaired by Charles Nash, a professor of chemistry at UC Davis. The senate charged the task force to "develop criteria, policy, and procedures for dealing with cases of gross incompetence among tenured faculty."

AAUP Associate General Secretary Jordan E. Kurland has notified the senate of the Association's interest in its deliberations. "We simply do not think highly detailed criteria are necessary," said Kurland, commenting on the Association's view of the matter. "Most universities allow termination upon demonstration of adequate cause, and that—together with a reasonable amount of initiative—is all a campus needs to deal with a handful of extreme cases." He pointed out that "when you start writing criteria and procedures to deal with the most grossly unfit, it just opens the door to having another category not quite as bad and yet another category not quite as bad as that."

"We are not in the business of search-and-destroy missions," task force chair Nash observed. "Our tentative view is that due process might well be served by mandating the initial offering of a rehabilitation contract between the faculty member and the institution."

The task force expects to shape preliminary recommendations for "conversation" with the academic council of the senate in July or August and possible senate action next fall.

MSU Board, Overriding President, Names Coach Athletic Director

The board of trustees of Michigan State University, over the objections of the

university's president, has named MSU football coach George Perles the university's athletic director as well, an action that may have far-reaching consequences.

Many students and faculty members fear that the decision, reached by a 5-3 vote at an emergency meeting in January, will give the university a reputation for emphasizing athletics over academics. The decision may have also weakened MSU President John A. DiBiaggio's ability to work effectively with the board on other matters.

President DiBiaggio had opposed the board's action, concerned that it would undermine the university's role in supervising the football program and that it would overlook certain hiring procedures involving affirmative action. The board named Perles athletic director only ten days after the position was first advertised.

The trustees have agreed that Perles will hold both posts for a period of one year, at which time the trustees and the athletic board will evaluate his performance. Some consider this agreement a compromise action by the board to mitigate some of the adverse reaction to their decision.

"The board of trustees should have realized that it's not in its best interests to have the same person as football coach and athletic director," said John Wiestart, a law professor at Duke University and chair of the AAUP Special Committee on Athletics. "The institution will be missing a crucial level of supervision and oversight."

Wiestart noted that "we haven't yet found the answer to what is the proper role of the university president in the oversight of an athletic program. That question is only the beginning of a larger discussion."

Court Finds Mercer University Guilty of Breach of Contract

A DeKalb County (Ga.) jury recently found the Mercer University Board of Trustees guilty of bad faith and breach of contract in voting last year to close

**ONE MILLION
OF THE BEST MINDS
IN AMERICA
HAVE ALREADY CHOSEN
THE BEST
RETIREMENT PROGRAM.**

TIAA-CREF.

© 1990 TIAA-CREF

TIAA-CREF is building a sound financial future for more than 1,000,000 people still at work. And over 200,000 retirees are now reaping the benefits of their TIAA-CREF retirement annuities. Since 1918, we've been dedicated to making sure that people like you in education and research can count on a comfortable retirement.

THE FIRST CHOICE IN EDUCATION AND RESEARCH

TIAA-CREF is the retirement system against which others are measured. For over seventy years, we've been building a tradition of solid performance and timely innovation, specifically for people in the education and research communities.

We pioneered the portable pension. We invented the variable annuity. In 1988, we created the CREF Money Market Account to give you more flexibility. We are introducing two new Accounts: the CREF Bond Market Account and the CREF Social Choice Account.

SECURITY, GROWTH, AND DIVERSITY — THE KEYS TO RETIREMENT INVESTING

Good retirement investing requires both security and growth: security, so the resources are sure to be there when the time for retirement arrives; and growth, so your retirement income will be sufficient for the kind of retirement you want.

TIAA's traditional annuity provides maximum safety, by guaranteeing your principal and a specific interest rate. And it provides the opportunity for growth through dividends—which we've declared every year for 41 years.

CREF investments are widely diversified, to help protect you against the volatility of any particular market, and to allow you to benefit from the strengths of several different types of investments.

A large portion of the CREF Stock Account portfolio is designed to track the U.S. market as a whole. The portfolio also contains international investments and stocks chosen specifically for their growth potential.

The CREF Money Market Account and the new CREF Bond Market and Social Choice Accounts will let you diversify further.* All CREF Accounts are managed by investment experts who understand the long-term strategies of sound retirement planning.

A RETIREMENT SYSTEM DESIGNED FOR EDUCATION AND RESEARCH

Teaching, research, and administration are lifetime jobs. But you may move from one institution to another many times in your career. The TIAA-CREF system gives you:

Portability—You can take your annuity with you to nearly 4,300 institutions with TIAA-CREF retirement plans.

Performance—The CREF Stock Account has outperformed the S&P 500 Index and mutual fund industry averages for the last 5- and 10-year periods.** The CREF Money Market Account has shown excellent returns, outperforming the industry average since May of 1988.***

Security—The TIAA-CREF system is designed to provide retirement income you cannot outlive.

Responsiveness—Our experienced retirement counselors are ready to answer your questions. You can call our toll-free numbers for performance figures, or information about your personal annuity accumulations.

Strength—Your future is protected by the largest retirement system in the world. We have done so well, for so many, for so long, that we currently manage over \$80 billion in assets.

TIAA-CREF. There's no one like us: dedicated to one group of people and one purpose—you and your future.

*The two new Accounts may not be available under all institutional retirement plans, but are available for all SRAs.

the university's College of Arts and Sciences in Atlanta, although the presiding judge in the case ruled out the possibility of keeping the Atlanta college open. The university's main campus is located in Macon.

The court ruling entitles affected students and faculty members to recover damages and to file individual lawsuits against the university.

In December 1989, the university's liberal arts faculty members in Atlanta received notices informing them of the termination of their appointments, effective the end of that month, on grounds relating to "the operating costs of the College." The board of trustees later retreated from the December date, voting instead to close the college effective June 30, 1990. Notices of termination effective that date were issued to all full-time faculty members.

Reeling from sudden news of a financial crisis and from the revelation of a \$14 million hidden deficit, the faculty at the school's Atlanta and Macon campuses had voted in December 1988 to approve resolutions expressing "no confidence" in President R. Kirby Godsey. The deficit, which had been mounting since 1982, was covered by short-term borrowing that nearly exhausted Mercer's borrowing capacity.

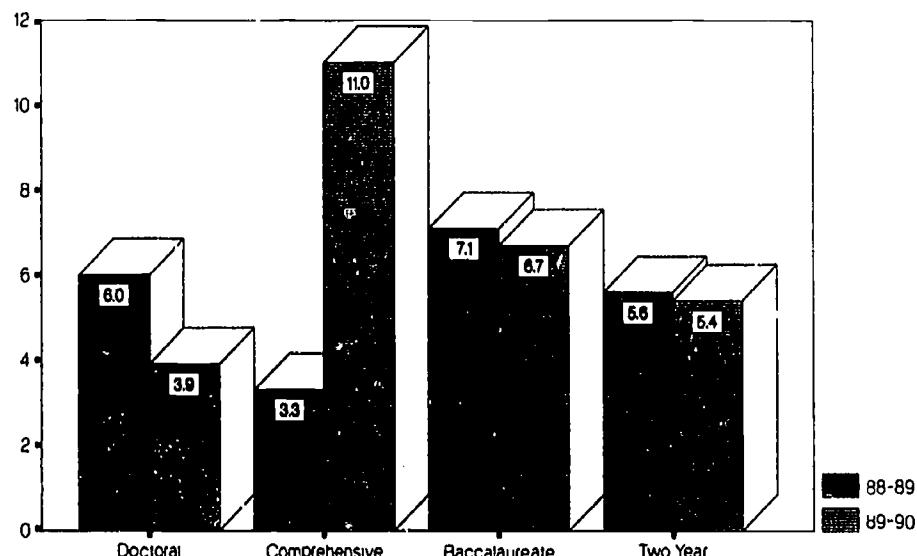

The loans, although approved by Godsey, were never submitted to the board of trustees. Budget documents showed that Godsey was set to receive a \$24,750 pay increase for 1989, which would have brought his annual salary to \$135,000.

The AAUP, in a letter to President Godsey last year, expressed its dismay over the fact that the decision to terminate faculty appointments was made

without any significant faculty participation. Regulation Four of the Association's *Recommended Institutional Regulations* calls for meaningful faculty involvement in decisions involving termination of appointments because of financial exigency or discontinuance of a program or department, particularly in determining "that all feasible alternatives to termination of appointments have been pursued."

Administrators' Salary Increases Fall Below Inflation Rate

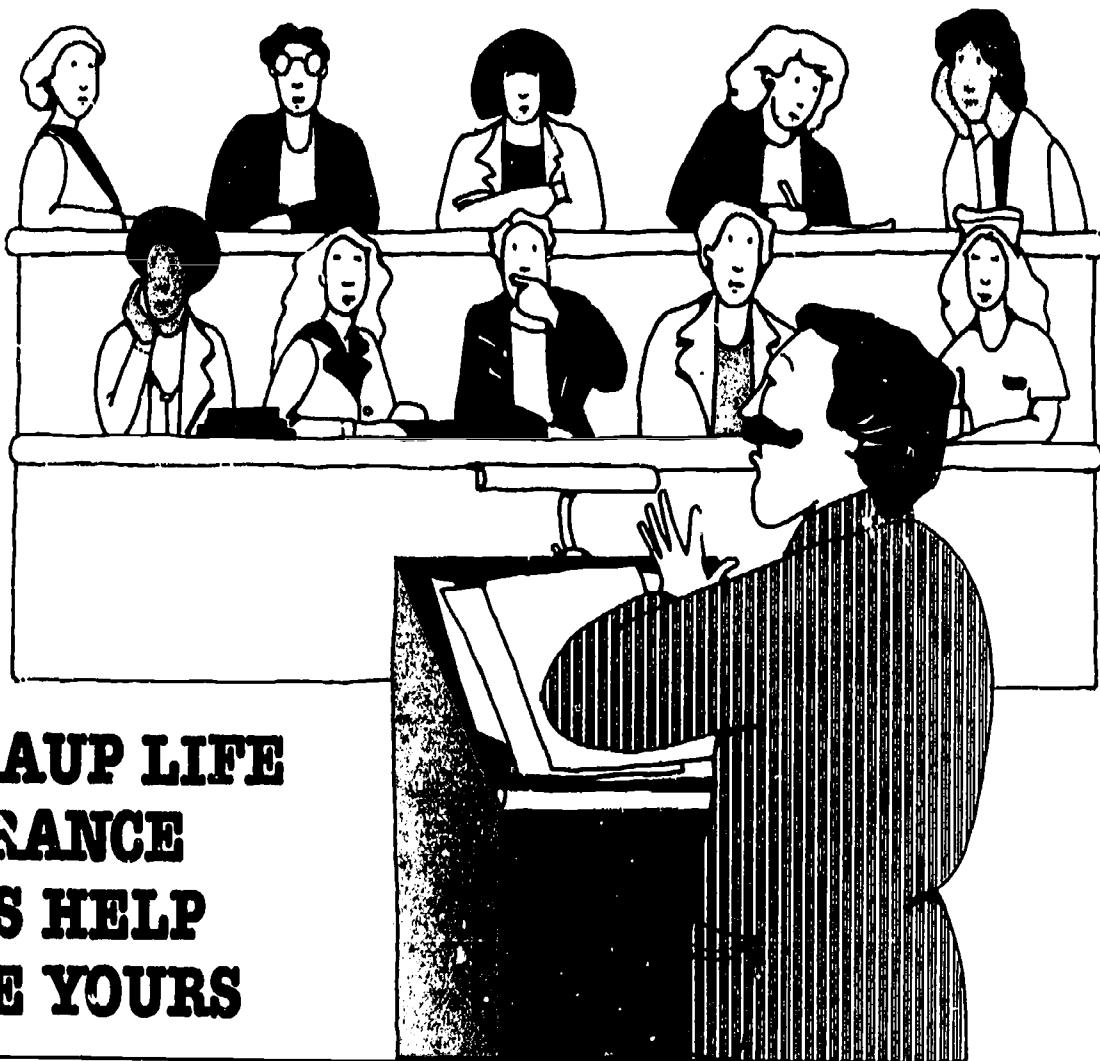

Salary increases for college and university administrators nationwide rose an average of 4.5 percent for the 1989-90 academic year, failing to match last year's inflation rate of just over 5 percent, according to a report released by the College and University Personnel Association (CUPA).

CUPA's survey, based on data drawn from 1,390 institutions, found that administrators in public institutions received salary increases averaging 4.6 percent, down from 4.9 percent in 1988-89, while their counterparts at private institutions averaged increases of 3.9 percent, which fell from last year's 6.7 percent increase.

Administrators at comprehensive institutions enjoyed pay increases of 11 percent, compared to increases of only 3.9 percent for administrators at doctoral institutions, the CUPA survey revealed. The salaries of administrators at baccalaureate institutions and two-year colleges climbed 6.7 percent and 5.4 percent, respectively.

"Even though in a given year there may be a wide disparity between the groups, the salaries in each group tend to average out over a few years," ex-

YOU SHAPE THE FUTURE FOR SO MANY . . .

LET AAUP LIFE INSURANCE PLANS HELP SHAPE YOURS

As an educator, you are busy shaping the future for many young people. And, of course, you are concerned about shaping the financial future for your family as well.

AAUP Term Life Insurance Plan can help. This plan can assure that, even when you are gone, your family can continue with the way of life you've worked so hard to provide. Education plans for your children need not be changed, because you know the money will be there.

The AAUP Term Life Insurance Plan offers:

- * group rates thanks to the purchasing power of all AAUP members.
- * coverage up to \$150,000 for both you and your spouse with no physical exam required.
- * non-smoking members a 5% discount on their premiums.
- * coverage up to \$2,500 for each child.

Take advantage of your AAUP membership today. For more information, complete the coupon below and mail it to AAUP Insurance Plans, 400 Locust Street, 8th Floor, Des Moines, Iowa 50398

or call toll-free 1-800-247-7989.

plained John M. Toller, personnel director at the University of Connecticut and a co-author of the survey analysis. "If you add the salary increases for a two-year period, the increases came out to 14.3 percent in the comprehensive institutions and 13.8 percent in the baccalaureate institutions. Some institutions tend to pay on a more consistently competitive basis, so there's less of the 'good-year, bad-year' syndrome."

Copies of the the 1989-90 *Administrative Compensation Survey* can be obtained from CUPA at 1233 20th Street, N.W., Washington, D.C. 20036.

Transferability Now an Option with CREF Funds

On March 1, monies invested in the College Retirement Equities Fund (CREF) became transferable to other investment managers. This development, which represents the most significant advance in CREF since its founding in 1952, ends the CREF "monopoly" over the \$40 billion in the fund.

The change originated in an application that CREF filed with the Securities and Exchange Commission (SEC) in 1985. AAUP was among the active participants in that proceeding and signed

the settlement agreement ultimately approved by the SEC.

Decisions on whether to permit faculty members and other TIAA-CREF participants to transfer accumulated funds to other investment managers must now be made on an institution-by-institution basis. Numerous investment companies are urging colleges and universities to adopt alternatives to TIAA-CREF and are also marketing themselves to individual participants.

The Internal Revenue Service has been reluctant to declare officially that certain kinds of transfers between investment managers can be made without tax liability. But the AAUP, in a collaborative effort with NEA, the faculty union from the State University of New York, TIAA-CREF, and representatives of the mutual fund industry, worked to persuade the IRS to clarify that transfers between higher education retirement fund investment vehicles would create no tax consequences for individuals. The IRS issued a revenue ruling with the necessary clarification just prior to March 1.

Within two years, TIAA expects to adopt provisions for the transfer of its funds. Because TIAA invests in longer term instruments, transfers out of TIAA will not be immediate but rather spread out over a ten-year period. Also in process are plans, which AAUP is closely monitoring, to revise the procedures for electing directors of TIAA and CREF.

Low Proportion of Students Graduate After Four Years, Study Finds

Only 15 percent of undergraduate students complete their degrees within four years, according to a recent study by the National Institute of Independent Colleges and Universities (NIICU).

The study, *Undergraduate Completion and Persistence at Four-Year Colleges and Universities*, shows that the overall degree completion rate for students who enrolled full-time in college directly from high school is 54.2 percent after six years at independent institutions, compared to 42.7 percent after six years at public institutions.

"It's clear that completing an undergraduate college degree in four years is not the norm in either the public or private sector," said Oscar F. Porter, assistant director of NIICU and author of the study. "While students in the independent sector are more likely to have completed their degrees in the traditional four years than students in the public sector, the overall degree

completion rate offers little solace for either sector."

The study finds that the college degree completion rate for African-American and Hispanic students is about 25 to 30 percent, compared to approximately 50 percent for white and Asian-American students. In general, ethnic groups achieve higher rates of completion in the independent sector. An exception is Hispanic students, whose rates show no appreciable difference in either sector.

Low socio-economic status emerges in the study as a significant impediment to college completion. Approximately 23 percent of the low socio-economic status students surveyed received a bachelor's degree within six years. As socio-economic status rises, degree completion rates increase, a pattern that differs very little in independent and public higher education.

Students who receive a grant in their first year of college more often remain enrolled than do students without grants. Of those students surveyed who received a grant during the first year, 90 percent were still enrolled in the second semester, while students without grants in the first year showed persistence rates of approximately 75 percent.

"It is important to the higher education community and the community at large to evaluate where we stand in relation to the goal of helping students complete their undergraduate degrees," said NIICU President Richard F. Rosser. "While we have had some successes, it is clear that quite a bit of work still needs to be done, particularly among economically disadvantaged and minority students."

CB Summer Institute Scheduled, Members Invited

The ninth annual Collective Bargaining Summer Institute will be held on the Westside Campus of Western Connecticut State University from July 26 through July 29, 1990.

The four-day training seminar is open to members of collective bargaining chapters, as well as AAUP members from non-collective-bargaining chapters who are involved in faculty advocacy. The institute helps participants develop skills in four specific aspects of collective bargaining. The workshops this year include chapter leadership, negotiations, contract and grievance administration, and advanced arbitration.

For additional information about the institute, contact Peggy Quinn at the AAUP Washington office.

Liberal Arts and Community The Feeding of the Larger Body

Marion Montgomery

"Montgomery's topic is the very nature of liberal education and why it has lost its articulation in the modern university. Montgomery is unique in that the level of his articulation includes literature—classical, religious, American, and modern—literary criticism, Scripture, political theory, metaphysics, and the movements of the general culture, including the status of science itself. Only someone with this range of interest and knowledge can do justice to the problems of education."

DOESN'T YOUR COURSE DESERVE YOUR OWN PUBLISHED TEXTBOOK...

RATHER THAN BUNDLES OF HANDOUTS?

Are you always trying to improve on inadequate standard textbooks with photocopied articles and other handouts?

Design your own textbook to cover just what you teach.

Join the growing number of university and college professors who have worked with Copley Publishing Group to develop their own textbooks.

At no cost or financial obligation to you, Copley will take the various materials you've chosen for your course and will handle all of the many, necessary details to put a professional textbook in your students' hands . . . details such as typesetting, printing, binding, copyrighting in your name, and arranging for the book to be sold at the campus bookstore.

Copley will also obtain permissions to be sure you do not violate the copyright laws.

Teachers Life Preferred™

It's
not for
everyone.

Teachers Life Preferred™ is not for everyone! It's a new individual annual renewable term insurance policy from TIAA, offered exclusively to people employed, full or part-time, in education and research. One of the lowest cost term life insurance policies available anywhere, Teachers Life Preferred features even lower rates for non-smokers.

With over \$43 billion in assets and 72 years of dedicated service to people in education and research, TIAA has earned a reputation of providing its policyholders with exceptionally low cost insurance and high quality personalized service. Teachers Life Preferred is TIAA's newest and perhaps best example.

Look for our information kit in the mail, or, at no obligation, call our toll-free number:
